What's New in the?

This tool will help you share the contents of your removable drive across the network. You can use it to create a network share and share your USB drives, memory sticks or SD cards.

SharePluggger has a very simple User Interface that makes it easy for users to share media content. How to install SharePluggger on your PC? Double-click on the SharePlugggerSetup.exe file and install the share pluggger tool in the Default/User Pictures folder to complete the installation of SharePluggger. How to use

SharePluggger? This tool will create and manage a folder and a share for the media drive that you want to share across the network. You can share your USB drives, memory sticks or SD cards. To share your media drive, you can select the network directory and password to access it from other computers, and create a secured file

share using the name, password and protocol selected on the ShareSettings tab. For example, if you select the Microsoft Network (Ethereal) share type and choose Yes to show the ShareSettings tab, your connection will be via MS Ethernet, with the security settings. The default name is: \\SHARE-PEGGER. What are the

features of SharePluggger?
